Dear Hiring Manager,  
Visa

I am writing to express my interest in the Visa Upskill Tech Pathway Virtual Learning Series as advertised. With a strong passion for technology and a solid foundation in computer science, I am eager to participate in this innovative program designed to prepare students for technical interviews at Visa.

As a dynamic and driven second-year Computer Science Engineering student at Techno India NJR Institute of Technology, I have actively sought opportunities to expand my skills and knowledge in the field of technology. My practical experience as a Data Science Intern at EISystems Services and IBM SkillBuild, where I led teams and collaborated on diverse projects, has equipped me with valuable insights into real-world applications of technology and the importance of effective communication and teamwork.

I am particularly excited about the opportunity to engage with industry professionals and gain exposure to coding best practices, foundational interview prep, and technical problem-solving strategies through the Visa Upskill Tech Pathway Virtual Learning Series. The chance to learn from experts in the field and enhance my readiness for future internships and career opportunities is invaluable to me.

My background in data science, machine learning, web development, and software engineering, as evidenced by my hands-on experience and relevant coursework, positions me well to contribute to and benefit from this program. I am confident that my strong leadership, communication, and problem-solving skills, coupled with my passion for technology, make me a suitable candidate for this learning series.

Enclosed is my resume, which provides additional details about my qualifications and experiences. I am excited about the possibility of participating in the Visa Upskill Tech Pathway Virtual Learning Series and contributing to Visa's mission of connecting the world through innovative and secure payments technology.

Thank you for considering my application. I look forward to the opportunity to further discuss how my background and skills align with the goals of the program.

Sincerely,

Rohit Agarwal  
Data Scientist Intern
